

Difference between `String str = "String"` and `String str = new String("String");`

Explain JVM Structures

How does JVM Allocates memory to object and primitive data Types

how to use new features of Java 8 in your project

how java 8 new features improve your project

Spring

how to do security like authentication and authorization in spring application

how to secure REST API

what is use of this annotation in System design `@qualifier`

Data Structures and Algorithms

Longest Increasing Subsequence | DP-3 - GeeksforGeeks

<https://www.geeksforgeeks.org>

Longest Consecutive Subsequence - GeeksforGeeks

<https://www.geeksforgeeks.org>

Longest Common Subsequence | DP-4 - GeeksforGeeks

<https://www.geeksforgeeks.org>

How you secure your REST API in your project?

How did you use OAuth 2.0? What is OAuth?

How did you do connection pooling in database?

Scenario: three rows of date insert to three tables. First two succeed, last one failed. How do you handle?

What are java8 new features?

Use new java features to filter `{1,3,5,2,1,6,7,8}` to find the numbers which are bigger than 5.

Different between hashmap and hashtable

Insert `{Kevin, New York}` and `{ Kevin, Dallas}` into a hashMap, does the second one replace the first one.

How to successfully put both into the hashMap and append 'Dallas' to 'New York', like Kevin = Dallas, New York

Given Input produce the desired output ::

`l/p -["5 google.mail.com", "6 msn.com", "1 ebay.mail.com", "5 wiki.org"]`

google.mail.com - 5

mail.com - 6 (5 [google.mail.com] + 1 [ebay.mail.com])

com - 12[5 + 6 + 1 + 1]

wiki.org - 5

org - 5

msn.com - 6
